

# Gordie Howe International Bridge

## Construction Activities - Canada

**Week of April 25, 2022**

### Canadian Port of Entry (POE)

- Block wall installation, interior plumbing, electrical, mechanical and HVAC rough-ins continue for the maintenance building.
- Reinforcing steel, second-floor and third-floor hangar installation and underground utility work continues for the main building.
- Slab on grade preparations continue for the secondary inspection building.
- Structural steel work continues for the client processing building.
- Backfilling activities continue for the primary inspection lane canopy.
- Waterproofing and backfill activities continue for the tolling building.
- Reinforcing steel for the piers and concrete placements for the pier footings continue as work begins on the booth footing for the tolling plaza.

### Canadian Bridge site

- Modifications continue to the tower jump form system.
- Concrete, rebar and formwork continue for the upper cross beam in the transition area from tower legs to pylon head.
- Concrete, rebar and formwork continue for side span piers.
- Approach bridge pile driving continues this week.
- Pier table floor beams are being erected this week.
- CanAm steel for the bridge deck continues to arrive on site.
